PROFESSIONAL SUMMARY

Multidisciplinary technology professional blending technical expertise in QA, front-end development, and application support to bridge the gap between complex software engineering and seamless user experiences. Passionate about innovation and creativity, with a strong focus on implementing Artificial Intelligence (LLMs, Prompt Engineering) and automation to optimize workflows, design smart documentation, and enhance product reliability. Experienced in international and fast-paced environments, combining technical troubleshooting with an analytical, user-centric mindset.

PROFESSIONAL EXPERIENCE

QA Analyst / Front-end Developer

Job Informatica

- Executed functional, exploratory, and regression testing on web applications to ensure system stability.
- Validated APIs using Postman and Swagger to analyze client-server interactions.
- Documented detailed defects in Jira with clear reproduction steps, bridging the gap between end-users and engineering.
- Evaluated interface behavior and usability, combining creative UI insights with technical validation to improve UX.

05/2024 – 12/2024

San Vendemiano,
Italy

QA Analyst / Front-end Developer

Previnet

- Tested large-scale digital products, identifying critical usability flaws and inconsistencies in user flows.
- Designed and executed structured test scenarios and test cases focused on perfecting the customer journey.

01/2023 – 12/2023

Preganziol, Italy

- Developed clear technical documentation, incident reports, and actively participated in Agile/Scrum sprints.

International Multidisciplinary Experience | Service Sector

(Italy)

05/2019 – 12/2022

Itália

- Developed high resilience, adaptability, and rapid problem-solving skills in high-demand operational environments like: cheff helper in a italian restaurante Pizzikoto or when I worked as a factory worker in the metal-mechanical sector.
- Achieved full cultural immersion and bilingual fluency in Italian while collaborating in multicultural teams.

QA

ADS

01/2014 – 11/2017

Matão, SP, Brazil

- Managed defect tracking, resolved non-conformities, and facilitated communication between suppliers and internal technical teams.
- Organized technical reports and monitored corrective action plans to maintain service excellence.

Customer Support

Disk Fone

01/2009 –

06/2009

Matão, SP, Brazil

- Provided remote technical support for non-technical clients.
- Logged and managed service tickets using CRM systems, ensuring high user satisfaction and proactive follow-ups.
